### New Thermage™ NXT Upgrade

#### Inside this issue:

New Thermage TXT 1

Uses of the Thermage 1

Night Of Beauty 1

Juvederm Special 2

Hand rejuvenation 2

We now offer 3 new revolutionary applications of Thermage therapy :

- Facial tightening and contouring with the SCT technology
- Cellulite reduction and smoothing of skin texture with the CL technology
- Deep Contouring and shaping of trouble spots with the DC technology

Summer has arrived along with bathing suits and light clothing for those hot summer days. In order to help you look your best, Dr. James Brazil has purchased the latest technology for tightening loose skin. The new **NXT Thermage™**.

The NXT Thermage™ is a radiofrequency device that offers improvement in skin tone and laxity. It works by producing volumetric heating deep in the dermis to improve elasticity and promote collagen production. Tightening and rejuvenation is seen gradually over the next 4

to 6 months.

Our experience is extensive since we purchased our first unit in 2003. The NXT Thermage™ upgrade now allows tightening of other troublesome areas throughout the body. Unsightly areas of cellulite and fatty tissue can be improved to help smooth out dimpling, (less cellulite) reduce volume (smaller thighs and abdomen) and tighten skin texture (less saggy skin).

Schedule your complimentary consultation to determine if you are a candidate for this exciting new Thermage technology!

### Night Of Beauty - September 16th, 5:30 to 7:00 pm

Olympic Dermatology is pleased to announce a continuation of our “Nights of Beauty” for our patients and their friends. Our last event was enjoyed by all and received rave reviews. Our events include the latest information on skin rejuvenation by Dr. James Brazil along with hor d’ oeuvres, beverages and complimentary gifts. Representatives from a variety of aesthetic companies and our staff will discuss many cosmetic procedures. Several cosmeceuticals companies will be represented and free color matches by Jane Iredale make-up will also be available. **RSVP at 360-459-1700. Space is limited! SEE YOU THERE!**

## *Juvederm Summer Special*

Ever notice how your cheekbones appear flattened and sunken or your lips smaller and surrounded by wrinkles? These are all due to a loss of volume in your facial structures due to aging. Fat pads shrink and descend, creating a flattened midface with prominent "parentheses" around the mouth. To correct this loss of volume Facial Fillers are available at our Clinic.

One type of filler we use, Juvederm, contains hyaluronic acid, a natural substance in your skin. Juvederm has properties that allow for optimal rejuvenation of the lips, cheek bones, "parentheses" around the mouth, and the hollows under the eye. They last up to one year and are extremely safe; since they are natural components of the skin they have no allergic potential. So treat yourself to a **Summer Special** for "fulfilling" rejuvenation.

**Come in between 8/25– 8/28 and receive \$50 off one syringe and \$100 off a second syringe. Limited space available . Make your complimentary**

**BE SURE TO CHECK OUT OUR WEBSITE

## *Hand Rejuvenation - A New Type of Make-Over*

Pre Radiesse Injection

Post Radiesse Injection

When it comes to revealing our age, our face and hands says it all. As we age, loss of fat and collagen begins to appear, especially on the hands, along with sun spots, visible bones and veins.

To keep that youthful appearance one must always be rigorous with daily use of **sunscreen and an effective skin care program.** Our clinic offers complimentary consultations for preventative skin care products that will help preserve youthful hands.

However, if aging and the sun's effects have already taken their toll, there are now effective rejuvenating

treatments that will bring that youthful appearance back to your hands.

### **Injectable Fillers:**

To plump up bony hands, one can replace volume with either Radiesse™ or Sculptra™. **Radiesse™** is made from calcium-based microspheres suspended in a natural gel. After a Radiesse™ injection, the effects are immediate and progressive due to the product's ability to create new collagen. Radiesse™ can last from 12 to 18 months.

**Sculptra™** is a lactic acid product that stimulates the body to create its own natural collagen. Therefore, volume loss is progressively

corrected with a series of injections. The improvement is very long lasting as seen with younger, more supple looking hands.

### **Intense Pulsed Light:**

Brown age spots are commonly seen on hands due to years of unprotected sun exposure. For pigmented areas, the use of our **Intense Pulsed Light (IPL)** systems can dramatically improve the tone and texture of your hands. A series of 2 to 3 IPL treatments can produce more youthful hands and with the injectable fillers your hands can look their best.

**Learn more at a Complimentary Consultation on how to make your hands look their Best!**
